

# Who'll Stop The Rain

by Creedence Clearwater Revival

G            Bm            C                            G  
Long as I remember the rain's been coming down  
G                            Bm            C                            G  
Clouds of mystery pourin' confusion on the ground  
C                            G            C                            G  
Good men through the ages tryin' to find the sun  
C                            D                            Em                            G  
And I wonder, still I wonder, who'll stop the rain

G                            Bm            C                            G  
I went down Virginia seekin' shelter from the storm  
G                            Bm            C                            G  
Caught up in the fable I watched the tower grow  
C                            G            C                            G  
Five-year plans and New Deals wrapped in golden chains  
C                            D                            Em                            G  
And I wonder, still I wonder, who'll stop the rain

G                            Bm            C                            G  
Heard the singers playin'; how we cheered for more  
G                            Bm            C                            G  
The crowd had rushed together just tryin' to keep warm  
C                            G            C                            G  
Still the rain kept pourin', fallin' on my ears  
C                            D                            Em                            G  
And I wonder, still I wonder, who'll stop the rain
